

Teacher: Paul Kwiatkowski

Class taught: 11 Design

Date and Time of observation: Tues 14 Oct 1:20pm - 1:50pm

What teacher is doing	What students are doing
- Asks starter questions - How many countries do you think are involved in global production of phone - has syllabus link - Engaged with both groups and listened to answers - Went through plans for lessons - Went over venn diagram from the last class - Giving verbal instructions about task use of humour Had key words at start Movement around the room	- Sit at 2 tables - Discussing starter questions - Listening respectfully during review - Watching video - The Economist - Listening to discussion - Got laptops out for research - Pairs/groups of 3 doing quick research on supply chain for constituent parts - Groups shared what they found from the research Everyone started with computer closed - working routine

The following elements of teaching and learning were observed during this lesson:

☐ Learning driven by inquiry	☒ Collaborative learning
☐ A LP attribute was explicitly developed	☐ Differentiated learning
☐ Learning focused on conceptual understanding	☐ Students developed as caring global citizens
☐ Students given agency to guide their learning	☐ Learning explicitly developed an ATL skill

Things that worked well

- Really like the slides with key words, questions and link to syllabus content.

Suggestions for growth

- What notes do you require students to take? Maybe consider having them write answers to some questions to make their thinking visible.
